Spanish	Nativo
Catalan	Native
English	Advanced(C1)
French	Basic

## Education

**2016 - 2021**

**Bachelor Degree in Computer Engineering**

*La Salle BCN, Ramon Llull University.*

## Work Experience

### NUVOLAR (2024-ACT)

*DevOps / Cloud Engineer*

As the DevOps Engineer responsible for the company's main backend project, I manage monitoring, implement CI/CD pipelines, and handle resource provisioning in AWS and Google Cloud within a Kubernetes environment. Additionally, I maintain the cloud infrastructure company-wide.

### NUVOLAR (2021-2023)

*Backend Developer*

Contributed to the development of the Scheduling Engine, a microservices-based system for efficiently assigning crew to flights. Utilized Java and the Spring framework to build scalable and maintainable applications, and implemented RabbitMQ for reliable inter-service communication.

### V2M (2019-2021)

*Software Developer*

Worked in a consulting role primarily focused on mobile app development and backend services. I contributed to multiple projects, including supporting the Mobile World Congress 2021 (MWC2021) app.
